

Aviation Models Information Sheet

AeroPro Aviation Models

AeroPro has developed a wide offering of accurate and detailed airline models. Available in various scales, our models are expertly crafted and detailed with only the highest quality materials. From the smallest puddle jumper to a large room filling jumbo jet, AeroPro can assist in bringing your model needs to reality. We focus on providing our world wide customers with models that ensure corporate brand recognition and accurately reflect their fleet of aircraft.

Diecast Models

These small, lightweight and cost effective models are perfect for in-flight sales or general promotional use. Made from solid diecast metal, the models are finished with a coat of paint and pad printed details. Landing gear and a stand are included along with a full color box.

Premium Snap Fit Models

Solid plastic with a weighted fuselage, these models do not feel like your typical snap-fit product. High quality details include spinning fan blades, rolling rubber tires with metal wheels, removable landing gear and more. These are the most popular model in our portfolio!

Executive Models

Perched atop a wood and metal stand, these premier-class models are composed of a solid resin fuselage coated in a durable finish. The decaled details are applied and aligned by hand while the clear top coat ensures a protective finish. Complemented by an embossed presentation box, these models are designed to leave a lasting impression.
